Professional Experience

Client Systems Engineer   *Sept. 2015 - July 2017*

Epic Systems, Technical Services – Hyperspace & Desktop

- Worked with teams from various Healthcare organizations to ensure the successful deployment and maintenance of the Epic EMR client infrastructure.
- Assisted IT community members with troubleshooting and resolving issues with the Epic EMR client application, Windows Server OS's, and third-party integration with our product.
- Built up and maintained XenApp farms for community members that have decided to allow Epic to host their client infrastructure.
- Wrote and maintained Windows PowerShell scripts in order to automatically deploy a XenApp farm.
- Contributed a module to our Epic.Support scripts to allow us to better track our community members' deployment software and hardware.
- Owned and improved the processes to the internal Client Systems XenApp loaner farm for development testing and debugging.

Projects

Aperture (Ruby on Rails, PostgreSQL, React, Redux)   Live | Github

A fullstack, single-page application inspired by 500px, a photography community app

  Applied Masonry.js to create reactive, image grid layouts for user-uploaded photos
  Utilized React's virtual DOM with a Redux store to sync state changes from database using RESTful API calls
  Stored photos on AWS S3 via the Paperclip and AWS-SDK gems to retain references in a PostgreSQL database
